

MATTHEW S. THOMAS

Computer Science

Matthew.Thomas.cs@gmail.com | (925) 997-1929

PROFESSIONAL SUMMARY

Computer Science graduate pursuing Sales Engineering with hands-on experience gathering stakeholder requirements, translating business needs into working software, and presenting technical solutions to non-technical users. Built and troubleshot applications using C#, JavaScript, Python, SQL, REST APIs, Git, and AI-assisted development tools. Strong technical communicator who enjoys understanding user problems, explaining technology clearly, and connecting software capabilities to practical business needs.

CORE SKILLS

Technical Communication: requirements gathering, solution presentations, technical storytelling, explaining technical concepts to non-technical users

Stakeholder Engagement: stakeholder communication, workflow analysis, use-case development, feedback gathering, documentation, cross-functional collaboration

Technology: C#, JavaScript, Python, SQL, REST APIs, Git, AI-assisted development, data analytics, software development

EDUCATION

Montana State University, Bozeman, MT 2022 - 2026
Bachelor of Science in Computer Science | GPA: 3.37 | Dean's Honor Roll

EXPERIENCE

ECC, Burlingame, CA May 2025 - Aug. 2025
Web Developer Intern

- Gathered requirements from project managers, schedulers, business stakeholders, and end users to uncover pain points, map workflows, and define technical requirements and success criteria for an internal scheduling solution.
- Designed, built, and validated a database-backed application using C#, JavaScript, SQL, REST APIs, Kendo UI, and Git; translated user needs into front-end workflows, integrations, and product functionality.
- Presented application functionality to non-technical stakeholders, explained technical decisions in clear business terms, gathered feedback, and recommended improvements based on user priorities.
- Troubleshot user and application issues, documented findings and next steps, and resolved technical barriers to strengthen reliability, usability, and adoption.

Fireman's Philanthropy, Bozeman, MT Aug. 2024 - Sept. 2024
Project Manager

- Led planning, volunteer coordination, outreach, and stakeholder communication, aligning multiple groups around objectives, timelines, responsibilities, and next steps.
- Adapted plans as requirements changed, resolved on-site issues, and helped deliver community events that raised more than \$22,000.

Ron Du Pratt Ford Dealership, Dixon, CA May 2024 - July 2024
Porter

- Delivered responsive customer service and coordinated with customers, service advisors, and mechanics to keep work moving in a fast-paced, customer-facing environment.
- Managed vehicle and service-lot operations with reliability, organization, safety, and close attention to changing customer and team priorities.

SELECTED PROJECTS

Internal Project Scheduling Website ECC Internship Project

- Turned stakeholder discovery into workflow, interface, database, and API improvements; presented functionality and incorporated feedback throughout iterative development.

Roblox Game | Unemployed Tycoon Personal Project

- Prototyping a large-scale multiplayer product with OpenAI Codex for technical research, implementation, troubleshooting, and rapid iteration.
- Designing progression, navigation, persistent player data, user interfaces, and server-authoritative systems in Roblox Studio and Lua.

NFL Statistics & Prediction Dashboard Personal Project

- Built database-backed data pipelines, statistical models, and interactive dashboards that convert complex NFL data into clear, decision-ready insights for non-technical users.
