

MATTHEW S. THOMAS

Computer Science

Matthew.Thomas.cs@gmail.com | (925) 997-1929

PROFESSIONAL SUMMARY

Computer Science graduate with experience developing customer-focused software solutions using C#, JavaScript, Python, Java, SQL, REST APIs, and web technologies. Experienced in working directly with stakeholders to gather requirements, improve workflows, troubleshoot issues, and deliver practical software solutions that solve real business problems. Strong background in full-stack development, system integrations, technical communication, and translating user needs into scalable applications. Seeking an entry-level Forward Deployed Engineer opportunity where I can combine software engineering, problem-solving, and customer collaboration.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, C#

Practices: requirements gathering, stakeholder feedback, troubleshooting

Web / UI: Kendo UI, internal web applications, scheduling tools

Strengths: technical communication, usability review, customer relations

EDUCATION

Montana State University, Bozeman, MT

2022 - 2026

Bachelor of Science in Computer Science | GPA: 3.37 | Dean's Honor Roll

EXPERIENCE

ECC, Burlingame, CA

May 2025 - Aug. 2025

Web Developer Intern

- Developed and enhanced an internal project scheduling platform used by project teams to manage schedules, activity updates, and approval workflows.
- Built and refined user-facing features using C#, JavaScript, and Kendo UI to improve scheduling workflows and usability.
- Worked directly with project managers, schedulers, and stakeholders to gather requirements, clarify business needs, and translate feedback into technical solutions.
- Improved scheduling workflows by implementing enhancements that streamlined project coordination and user interactions.
- Collaborated with technical and non-technical teams to troubleshoot issues, improve usability, and deliver practical software solutions.

Fireman's Philanthropy, Bozeman, MT

Aug. 2024 - Sept. 2024

Project Manager

- Organized event logistics, schedules, volunteers, and operational planning for community fundraising events.
- Managed competing priorities, resolved on-site challenges, and adapted plans to changing requirements.
- Helped coordinate successful events that raised over \$22,000 for local charitable initiatives.

Ron Du Pratt Ford Dealership, Dixon, CA

May 2024 - July 2024

Porter

- Managed customer vehicle movement safely and efficiently while supporting mechanics, service advisors, and daily service-lot operations.
- Maintained a clean, organized, and safe service lot and provided courteous customer shuttle service with professionalism and reliability.

SELECTED PROJECT

Internal Project Scheduling Website

ECC Internship Project

- Contributed to a web-based scheduling tool designed to centralize schedule information and make updates more accessible to project teams.
- Improved workflows by incorporating stakeholder feedback and refining the interface around real scheduling needs.

Unemployed Tycoon Roblox Game

Personal Project

- Building a multiplayer Roblox simulation game with progression systems, persistent player data, in-game economies, and interactive business mechanics.
- Managing the full development lifecycle, including design, implementation, testing, and feature planning.

NFL Statistics & Prediction Dashboard

Personal Project

- Developed a web-based analytics platform that aggregates NFL team and player data to provide performance metrics, trend analysis, and game predictions.
- Designed data pipelines, statistical models, and user-facing dashboards to help users explore and interpret complex sports data.
