PROFESSIONAL SUMMARY

Computer Science graduate and aspiring Sales Engineer with hands-on experience leading stakeholder discovery, translating business and technical requirements into working software, and presenting solutions to technical and non-technical users. Built and troubleshoot applications with C#, JavaScript, Python, SQL, REST APIs, Git, and AI-assisted development tools. Consultative communicator prepared to support customer discovery, tailored demonstrations, technical validation, and solution adoption across SaaS, AI, cloud, data, and cybersecurity.

CORE SKILLS

Solution Consulting: technical discovery, requirements analysis, solution design, demonstrations, technical storytelling

Customer Engagement: stakeholder communication, use-case development, adoption support, documentation, collaboration

Technology: C#, JavaScript, Python, SQL, REST APIs, Git, AI-assisted development, data analytics, software development

EDUCATION

Montana State University, Bozeman, MT

2022 - 2026

Bachelor of Science in Computer Science | GPA: 3.37 | Dean's Honor Roll

EXPERIENCE

ECC, Burlingame, CA

May 2025 - Aug. 2025

Web Developer Intern

- Led discovery with project managers, schedulers, business stakeholders, and end users to uncover pain points, map workflows, and define technical requirements and success criteria for an internal scheduling solution.
- Designed, built, and validated a database-backed application using C#, JavaScript, SQL, REST APIs, Kendo UI, and Git; translated user needs into front-end workflows, integrations, and product functionality.
- Presented solution functionality to non-technical stakeholders, explained technical tradeoffs in business terms, gathered feedback, and recommended improvements aligned with user priorities.
- Troubleshoot user and application issues, documented findings and next steps, and resolved technical barriers to strengthen reliability, usability, and adoption.

Fireman's Philanthropy, Bozeman, MT

Aug. 2024 - Sept. 2024

Project Manager

- Led planning, volunteer coordination, outreach, and stakeholder communication, aligning multiple groups around objectives, timelines, responsibilities, and next steps.
- Adapted plans as requirements changed, resolved on-site issues, and helped deliver community events that raised more than \$22,000.

Ron Du Pratt Ford Dealership, Dixon, CA

May 2024 - July 2024

Porter

- Delivered responsive customer service and coordinated with customers, service advisors, and mechanics to keep work moving in a fast-paced, customer-facing environment.
- Managed vehicle and service-lot operations with reliability, organization, safety, and close attention to changing customer and team priorities.

SELECTED PROJECTS

Internal Project Scheduling Website

ECC Internship Project

- Turned stakeholder discovery into workflow, interface, database, and API improvements; presented functionality and incorporated feedback throughout iterative development.

Roblox Game | Unemployed Tycoon

Personal Project

- Prototyping a large-scale multiplayer product with OpenAI Codex for technical research, implementation, troubleshooting, and rapid iteration.
- Designing progression, navigation, persistent player data, user interfaces, and server-authoritative systems in Roblox Studio and Lua.

NFL Statistics & Prediction Dashboard

Personal Project

- Built database-backed data pipelines, statistical models, and interactive dashboards that convert complex NFL data into clear, decision-ready insights for non-technical users.
